

Friends in the Garden

Plants grow better in the garden
When they grow next to their friends
Plants grow better in the garden
When they grow next to their friends

A friend can be an herb, or a bug, or a flower
They can all get along
The most important thing about friends in the garden
Is that when they're together
They make each other stronger (stronger, stronger, stronger)

Grow basil with tomatoes
You can't go wrong
Make pizza for your friends
All summer long

Plants grow better in the garden when they grow next to their friends

Have you heard, have you heard
About the Three Sisters?
Corn, beans & winter squash
Beans climb up the tall corn stalks
While the squash keeps it shady
Keeps bad bugs and weeds away
Native Americans discovered these friends
Thousands of years ago
Did you know?

Plants grow better in the garden when they grow next to their friends
A friend can be an herb, or a bug, or a flower
They can all get along
The most important thing about friends in the garden
Is that when they're together
They make each other stronger (stronger, stronger, stronger)

Friends in the Garden

Thyme is a best friend
To collards, cabbage and kale
Keeps the bad bugs out
Brings the good bugs in
With thyme as a friend you will always win

Plants grow better in the garden when they grow next to their friends

Some plants are friends
To everyone they see
Like marigolds and yarrow
They love Everybody!

The most important thing about friends in the garden
Is that when they're together
They make each other stronger (stronger, stronger, stronger)
Plants grow better in the garden when they grow next to their friends
Plants grow better in the garden when they grow next to their friends!
