

Keep it Clean

Did you ever stop to think 'bout what you put in your mouth?

Did you ever stop to wonder?

The apple that you rinsed, was it really clean?

How do you know

How can you tell

Do you even know what I mean?

I think it's time

We had a talk

About growing

Organically

Fresh food is part of nature

It is meant to be grown naturally

Not with chemicals

From a laboratory

That's the first rule of growing organically

Pesticides are part of growing food

Controlling the bugs that will kill your plants

They must be natural

Or they poison the Earth

We must be kind to the planet and our bodies

What does organic mean?

It's a way to keep the Earth and your body clean

What does organic mean?

It's a way to keep the Earth and your body clean

What does organic mean?

It's a way to keep the Earth and your body cleeeeeeeeeean

Keep it Clean

GMOs are far from natural
They change the way food and animals were meant to grow
Who knows what happens
When you eat GMOs
No one knows, all we know is it's not healthy

We fertilize to nutrify the soil
Give nourishment to plants and help them grow
Synthetic fertilizers
Mess up the soil
Make it toxic and poison all the food that you grow

What does organic mean?
It's a way to keep the Earth and your body clean
What does organic mean?
It's a way to keep the Earth and your body clean
What does organic mean?
It's a way to keep the Earth and your body cleeeeeeeeeeean

Yeah, yeah
Keep it clean
