

SeedsSoilWaterSun

Seeds, soil, water, sun
Seeds, soil, water, sun
That's all you need to grow
To grow a plant

First you find a spot that gets a lot of sun
Most plants
Like about
6 to 8
Hours of sun

Take a garden fork and loosen up the soil
Be kind
To the worms
That come up
In the soil

If the soil is weak, then you must amend
Compost
Manure
Or coco coir
Is what you add

Seeds, soil, water, sun
Seeds, soil, water, sun
That's all you need to grow
To grow a plant

Now it's time, take a seed, put it in the soil
How deep
You better know
Before you plant
So it can grow

Little seeds stay close to the top of the soil
Big seeds
Go deeper
Down into
The soil

SeedsSoilWaterSun

Spread some mulch over top, make your plants happy

Mulch keeps
Water in
So plants don't get
Too thirsty

Seeds, soil, water, sun
Seeds, soil, water, sun
That's all you need to grow
To grow a plant

Keep the soil moist and check it every day

Some seeds
Sprout fast
Other seeds take
Several days

Now you can plant some seeds and grow anything

Grow food
So you can munch
Grow a little
Or a bunch

Seeds, soil, water, sun
Seeds, soil, water, sun
That's all you need to grow
To grow a plant

Seeds, soil, water, sun
Seeds, soil, water, sun
That's all you need
To grow
